PROFESSIONAL DEVELOPMENT SEMINAR

Sandplay and Psyche: Jungian Sandplay in Psychotherapy

23 November 2019

Governors Bay (near Christchurch) New Zealand

A series of sandplay images portrayed in the sandtray create an ongoing dialogue between conscious and unconscious aspects of the client's psyche, which activates a healing process, and the development of the personality (International Society of Sandplay Therapy).

Sandplay and Psyche: Jungian Sandplay in Psychotherapy

Sandplay therapy activates preverbal and somatic registers. Using experiential sand activities and clinical material, Sarah Gibson (Sydney) and Joy Norton (Melbourne) will introduce participants to Jungian sandplay. They explore the role of the sand in sandplay and the place of sandplay within longer term psychoanalytic psychotherapy.

Sarah and Joy will each show examples of their approach to working with symbols as they appear in the sandplay images of their clients. They will give some attention to the reverie process of the therapist while a client works in the sand. The seminar will focus on the ways in which sandplay assists clinicians working with trauma and the preverbal and pre-symbolic with adult clients. There will be an opportunity for participants to experience working with the sand.

This seminar will be of interest to clinicians unfamiliar with Jungian sandplay. For those already working clinically with sandplay the seminar aims to expand their awareness of the symbolic language of sandplay and deepen their knowledge of sandplay in Jungian depth psychotherapy.
